Matric	BISE Kohat	

## Experiences / Jobs

### Summary

*Overall I have 10+ years post degree programming experience, I started with C++ & VB6 in my student life and then moved to VB.net and created small and interesting applications.*

*In 2011 I have completed my Masters and started my career, worked with different companies and organizations mentioned below. Currently working with Core-PHP, CakePHP and other related technologies and frameworks.*

### Application Analyst at Al Dhafra Cooperative Society

- Present

Currently working as Application Analyst at [www.adcs.ae](http://www.adcs.ae)

my role here is to make applications for every process and activity in the company which might need integration with other systems like ERP, Emirates ID card readers etc.

At ADCS I have developed [www.adcs.ae](http://www.adcs.ae), employee clearance Forms, Letters management system, Raffle application for ADCS retail supermarkets, Shareholder meeting managements system, Abu Dhabi Municipality subsidized goods application concession for locals in stores and quota management. Employee Self Service (In Progress).

above application I have developed using .net, PHP, JQuery Bootstrap etc. and I am open to IT team to give ideas for upcoming application

### Senior PHP Developer at USP

- Present

Unique Software Professionals (USP) is UK based company and we were working for them from Peshawar, Pakistan branch, USP has multiple software products like Online Learning Management System, Recruitment Management System and many other.

Here at USP pk I was programming team leader, and dealt with different phases of web designing and development like modeling, designing, compatibility, development, testing and maintenance.

### **CakePHP/Database Developer at BEFARe**

- Present

BEFARe is Local NGO working for USAID, UN and other International NGOs at multiple cities of Pakistan.

I was Hired to develop data entry web application where about 30-50 DEOs from multiple branches can enter data daily

Managers can see different reports, create users, assign/revoke different privileges create update delete dynamic data entry forms and many more

They were also having old Data in an un-normalized mysql database to be copied to new web application which was successfully copied by scripting and generating SQL Queries

---

### **Software Engineer (web) at Phanteams**

- Present

Phanteams is US Based software house with sub branches in different Asian countries, we were working at Peshawar Pakistan for Phanteams.

Started with cakephp to create webservices and CMS for IOS application, including dynamic Menus, content, Members, login, register, forget password and more

There I worked having multiple projects at the same time switching daily or weekly, and daily meetings with project managers/clients at US office to demonstrate things and get further directions

Overall very strict timing, attendance fulltime on work at office, online logging daily tasks to redmine

---

### **Senior PHP Developer at IT Artificer**

- Present

Me and my 2 classfellows started our own business as we qualified to get financial subsidy from govt to start business

We were new and expermented many tacticks to survive, lowered the rates, did hard work by giving more time, started PHP training classes to cover financial difficiencies

I could not continue there because I got better oppertunity at Phanteams as salaried employee.

## **Portfolio**

### [Abu Dhabi Municipality POS](#)

192.168.0.168:8282

Developed at ADCS, alone

Ajax, BootStrap, Cake PHP, JQuery, mobile friendly, MySql, HTML5

---

### [ADCS \(Raffle App\)](#)

<http://www.adcs.ae>

Developed at ADCS, alone

Ajax, BootStrap, Cake PHP, CSS3, HTML5, JQuery, mobile friendly, MySql, PHP, Responsive

---

### [ADCS \(Main website\)](#)

[www.adcs.ae](http://www.adcs.ae)

Developed at ADCS, 1

Ajax, ASP.net, BootStrap, C Sharp, CSS3, Google Map, HTML5, JQuery, mobile friendly, MS SQL Server, Responsive, SEO, theme development

Multilang

---

### [Coding Sips](#)

<http://www.codingsips.com/>

Developed at home, alone

BootStrap, CSS3, HTML5, mobile friendly, Responsive, theme development, wordpress  
my personal blog

---

### [PERSI](#)

<http://119.9.94.61/>
